

# Truck Mixer | Training Programmes | Contacts

**Truck Mixer** A concrete mixer is a device that homogeneously combines cement, aggregate such as sand or gravel, and water to form concrete. A typical concrete mixer uses a revolving drum to mix the components.

Our Service Include:

- Experienced & Certified Operators and drivers.
- Reliable, extremely well maintained machines
- Preventive maintenance by German Gulf Enterprises Ltd.
- Back up machines availability
- 24 X 7 On- Site skilled support
- Consultancy for your project solutions
- Flexible Hire Periods

## Concrete Mobile Pump | Stationary Concrete Pump Moli Pump | Mixocreet or Screed Pump

**Mobile Concrete Pump** incorporates both a concrete pump and a placing boom mounted onto a truck chassis. The boom length varies from 36 to 60 meters in our fleet.

The advantage of a mobile pump is that it can turn up at a job and be pumping concrete very quickly to anywhere within the range of the boom. This makes mobile boom pumps very popular on the widest range of construction projects, being able to pump at very high volumes quickly to wherever concrete is needed with minimum labor requirements.

**Stationary Concrete Pump BSA** A Static Concrete Pump, also referred as a Stationary Concrete Pumps. It requires separate pipeline for concreting. A Static Pump needs to be towed or separately transported to job site

**A Moli Pump** also referred as a Mobile Static Pump. A static pump is mounted on the truck chassis. The Moli pump can be flexible in shifting to various site locations.

**Mixocreet or Screed Pump** These machines are specially designed for semi dry material and these machines are recommended for

1. Floor screed
2. Sand
3. Aggregate

Mixokret operates with compressed air according to the plug conveyance principle. Our fleet consists of diesel powered engine & electrical operated.

## Grouting & Piston Pump | Worm Pump Plaster Machines | Placing Booms

**Grouting & Piston Pump** Mix, pump and spray with one robust and powerful Putzmeister P 13 mortar machine. With three speed settings for adjustable output, this machine works with pre-mixed and site-mixed. Besides site mixes made of local plastering sand, cement and/or lime with water, any common preblended dry mortars like lime mortar, lime-cement or cement mortars, grouts, insulation mortars, bentonite, masonry mortars, etc. can be applied

1. For filling of joints between prefabricated components and finished products and in site mixed concrete
2. To close opening and gaps in concrete
3. For grouting of bridge bearings, crane rails, machine supporting feet.
4. For filling works when integrating steel parts into concrete
5. For securing and casting of anchor holes in the rock and mountain locking

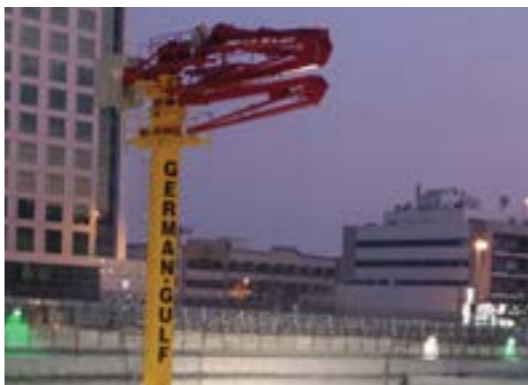

**Worm Pump** The compact and versatile P 11 is the standard for operation, comfort, performance and mixing quality for worm pumps. It is ideal for pre-mixed and site-mixed mortars. The P11 processes site-mixes or pre blended dry mortars for interior and external plastering supplied in bags. Monoouché (Monocapa), fire-proofing mortar, base coat plaster, lightweight masonry mortar, ornamental plaster, concrete repair mortar fiber mortar, mortars for filling/grouting work

**Plaster Machines** Putzmeister MP 25 has all the advantages of a high-value mixer pump, but it's small and simple to operate. It is just what you need for those smaller jobs or as a spare machine and is ideal for ground coat plaster, adhesive and reinforcement mortar, refractory mortars, and texturing plasters.

The MP25 is a fully equipped, reliable mixer pump that is ideally suited to the construction site for plastering works. The MP25 is quick disassembled in components for easy transport, service and cleaning. Application The MP25 is the ultimate mixing pump which works with any common preblended dry mortars up to 4mm grain size.

**Placing Boom** Placing Systems stand tall around the UAE. Our complete line maximizes your system and provides the flexibility so you can place concrete faster and uniformly with pinpoint accuracy. Unmatched in the industry, Putzmeister Placing Systems provide the highest free-standing heights without counterweights, and offer the widest variety of mounting and climbing configurations.
